

T. GANGADHAR REDDY

Full Stack Developer | Python, React.js, FastAPI, AI Integration

Kadapa, Andhra Pradesh, India | gangadharreddy065@gmail.com | +91 9603228769 | [LinkedIn](#) | [GitHub](#)

PROFESSIONAL SUMMARY

Final-year B.Tech CSE (AI & Data Science) student with hands-on experience building and deploying full-stack web applications using React.js, FastAPI, Python, and SQL. Skilled in REST API development, JWT authentication, database design, and Git-based version control. Proven ability to ship production-deployed projects end-to-end, from UI design to cloud deployment, with growing expertise in AI/ML integration. Seeking SDE, Full Stack, or Web Developer internship roles.

TECHNICAL SKILLS

- **Core (hands-on, project-tested):** Python, JavaScript, SQL, React.js, FastAPI, Flask, SQLAlchemy, PostgreSQL, MySQL, SQLite, JWT Authentication, Role-Based Access Control, REST API Development, Git, GitHub
- **Familiar With:** Next.js, OpenCV, MediaPipe, Postman, Gunicorn, HTML5, CSS3, Responsive Web Design
- **Core Concepts:** OOP, DBMS, Data Structures, Problem Solving, Agile-style Project Workflow

PROJECTS

Jobetix — Full Stack Job Portal Application

- Developed and deployed a production full-stack job portal supporting user registration, login, job search, and application workflows for both job seekers and employers.
- Implemented JWT-based authentication and role-based access control, securing API endpoints across two distinct user roles.
- Built and integrated RESTful APIs using FastAPI with PostgreSQL for persistent data storage, replacing an earlier SQLite implementation to support production-scale deployment.
- Designed a fully responsive React.js frontend and resolved SPA routing and CORS configuration issues during deployment.
- Deployed and maintained the live application on Render with separate frontend/backend services.

Tech Stack: React.js, FastAPI, SQLAlchemy, PostgreSQL, JWT, Render

[Live Demo](#) | [GitHub Repository](#)

Intelligent Attendance Monitoring System with Anti-Proxy Detection

- Built a computer-vision-based attendance management system using OpenCV and MediaPipe to detect and prevent proxy attendance through facial/landmark verification.
- Designed and implemented secure attendance tracking, record management, and audit features using Flask and SQLite.
- Improved attendance verification accuracy and transparency compared to manual/roll-call methods, and deployed the system using Gunicorn for production-style serving.

Tech Stack: Python, Flask, SQLite, OpenCV, MediaPipe, Gunicorn, HTML5, CSS3, JavaScript

[Live Demo](#) | [GitHub Repository](#)

Student Management System

- Built a full-stack student management web application using Next.js 16 (App Router) and React 19, enabling administrators to perform complete CRUD operations on student records with real-time dashboard analytics.
- Architected the backend with Next.js Route Handlers and Prisma ORM connected to Neon Serverless PostgreSQL, implementing RESTful API endpoints with UUID-based routing, unique email constraints, and automatic timestamps.
- Developed an interactive data table with client-side search, multi-criteria filtering, and column sorting, along with one-click Excel/CSV export for generating comprehensive summary reports.
- Designed a premium responsive UI featuring dark/light theme toggle, glassmorphism effects, confirmation modals, toast notifications, and skeleton loading states, and deployed the application on Vercel with server-side rendering.

Tech Stack: Next.js 16, React 19, TypeScript, Prisma ORM, PostgreSQL (Neon Serverless), CSS3, Vercel

INTERNSHIP EXPERIENCE

Web Development Intern — InAmigos Foundation May – Jun 2026

- Completed a hands-on web development internship, contributing to real project tasks and earning a verified completion certificate.

AI Deployment & Automation Intern — EduSkills Jan – Mar 2026

- Worked on AI deployment workflows and automation pipelines, applying core deployment concepts to practical use cases.

Android Developer Virtual Intern — EduSkills Apr – Jun 2024

- Learned mobile application development concepts including UI design and app lifecycle fundamentals.

HACKATHONS & TECHNICAL PARTICIPATION

- Smart India Hackathon (SIH) 2025 — National-level hackathon, built a working prototype under a 36-hour deadline.
- National Level 24-Hour Hackathon — Sri Manakula Vinayagar Engineering College (SMVEC)
- XE Conclave 24-Hour Hackathon — Xebia

EDUCATION

B.Tech, Computer Science Engineering (AI & Data Science) 2023 – 2027

Takshashila University — CGPA: 8.02

Intermediate (MPC) 2021 – 2023

Sri Chaitanya Junior College — 70.4%

SSC 2021

ZP High School — GPA: 8.7

CERTIFICATIONS

- IBM Data Analysis with Python
- IBM Python 101 for Data Science
- Data Analysis Using Python
- Python Using AI Workshop
- Stock Market Using AI Workshop
- No-Code Web App Development with Bubble.io
